

Omni Spectral Correlator

Spectrum Analyzer type Oscar

Welcome to Oscar- 5000,
the most technologically
advanced counter
surveillance detection
system on the market today.

When sensitive information
is critical to your success,
the Oscar is the only product
that provides an automatic,
reliable and cost effective
means of protecting your
business environment 24
hours a day.

Oscar is designed to detect all major types of audio and video transmitter including RF, carrier current, and infrared.

Oscar provides a compact "carry-on" piece of equipment for Automated Spectrum Monitoring and In-Place RF Monitoring. Frequencies between 10 kHz and 21 GHz if the attached antenna is used.

Oscar combines all the functions of a switched and amplified antenna array, peak detection circuitry, wideband, search receiver, demodulator, audio correlator, computer controller, LCD display and hardcopy printer into one briefcase.

Oscar is simple, easy to use, reliable, and lightweight, cost effective system that out performs government and military systems costing much more.
